

2nd Generation

# MICRO-100 OS18

One-Shot and Universal Depositing Machine

Highly accurate filled and solid products in one step – up to Quadro Shot, for regular products and seasonal articles:

- Pralines • Truffle Balls • Bars
- Tablets • Drops • Eggs

- Power On
- Select Recipe
- Add Masses
- Place Mould
- Produce your Product
- Quick Return on Investment

### Leading One-Shot Software Technology

Sophisticated technology enables a wide range of different fillings that can be deposited. Masses from liquid to high viscosity. Filling volume of up to 80% as well as solid ingredients can be processed.

### Features

- AWEMA One-Shot software technology with full graphic interface
- 18 pistons for 9 One-Shot or 18 solid products in one depositing stroke
- Mobile and compact dimensions: 1'000/1'800 x 795 x 1'600 mm (L x W x H)
- Large depositing range with up to 80 mm piston stroke, standard diameter 20 mm
- Quiet operation with 100% servo controlled motions including overload protection
- Accurate and adjustable automatic electrical 4 zone temperature control
- Designed for easy handling and cleaning including no tool belt change
- USB Interface for backup / recovery and recipe exchange
- Security stop, nozzle break and mould protection system
- Suitable for existing moulds by adapting the nozzle plate
- Patented dosing system
- Operation language online selectable
- Remote connection pre-installed
